## IL VERIFY BY INSTRUMENT LIFE

Originally created to track the movement of music equipment, we added consumable items and iL Verify has become the ideal affordable solution for organizations like churches and schools needing to control inventory counts. The software allows you to use your phone for bar code or NFC chip scanning and setup multiple users, so your team is all connected. We added a time clock and task completion for the perfect all-in-one tool for about $20 / month. Get started for FREE today.
